**i-FX-Q<sub>2</sub>**

**Lowest sound  
emissions**

**Self-adaptability with  
simultaneous loads**

**+20%**

**SCOP**

**than fixed  
speed units**

**+32%**

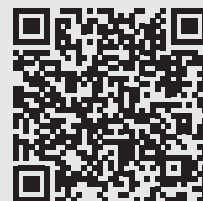

**EER**

**than fixed  
speed units**

**i-FX-Q2 is the first unit for simultaneous heating and cooling with full DC Inverter technology. This allows the unit to deliver any combination of heating and cooling loads in any season with much higher efficiency than fixed speed units, proven by outstanding +20% SCOP and +32% EER values against fixed speed units.**

Available with cooling capacities from 341 to 1125 kW, the unit can be further tailored to specific conditions or peculiar project requirements thanks to a wide array of accessories and flexible size and configuration selection.
